Computer Science Department

Multimedia Applications and Virtual Reality

Master – Artificial Intelligence and Application

Continuous assessment – 15 min

Full Name : . . . . . .

Birthday : . . . . . .

Question : Check the boxes of the correct matches:

	The user/developper action	Geometric Modeling	Kinematic Modeling	Topological Modeling	Semantic Modeling
1	Object Primitive coordinates				
2	Changing object primitive coordinates				
3	Grouping objects (fixed distance between them)				
4	Stopping an object's movement when it gets close to another object				
5	Vibrating the whole world when an object reaches a minimum distance from another object				
6	Changing ambient light when an object leaves the scene				
7	Fixing an object's coordinates to a minimum value				
8	Fixing an object's coordinates to a maximum value				
9	Fixing an object's width to twice the height of a given object				
10	Setting some object attributes such as colors, sizes, textures…

Birthday : . . . . . .

Question : Check the boxes of the correct matches:

	The user action	Proprioception	Vestibular	Kinanesthesia	Tactile	Cutaneous	Force Feedback
1	Pushing a table						
2	Recognizing a fruit						
3	Walking on the street						
4	Recognize the wright orientation of the scene						
5	Feeling the blows during a martial fight						
6	Feeling the temperature of the objects in the scene						
7	Distinguishing the different environments (air, water, etc.)						
8	Dancing						
9	Lifting weights						
10	Scrolling through a virtual menu
