– Tutorial Sheet 1 : Media & Communication –

Exercise 1 – Concepts and definitions

Considering the following applications:

→ **PDF** file,	→ Image processing **software**,	→ Dynamic **web page** (Registration form for a training course),
→ **Text** file (*.txt),	→ Static **web page** (Presentation of Training course),	→ Electronic **Agenda**.
→ **Video** file (Documentary),		
→ Stock management **software**,		

1. What is the dimension of each application?
2. What are the multimedia applications?
3. What are the interactive applications?
4. Give the definition of a scene in each application cited.

Exercise 2 – Definition / Expression dimension

Considering the following information:

- Colors,	- Dimension of a room,	- Sweet smell,
- Song,	- Texture of objects,	- Book Chapter,
- Bird song,	- Acidity of a drink,	- Computer Algorithm.

1. In which dimension is each piece of information defined?
2. How can this information be redefined in the other dimensions?
   → Express the redefinition of information by detailing the potential information loss.

Exercise 3 – Communication Process

1. Define the following:
   → Message
   → Physical support
   → Channel
   → Perceptual dimension
2. Match each example with its corresponding **support** and **perceptual dimension**:
   Podcast, printed photo, VR game controller vibration, text displayed on a smartphone.
